

FLOOR POLISH STRIPPER

Product description

BioHygiene Floor Polish Stripper utilises alkaline cleaning agents and solvents to provide a powerful, fast acting emulsion floor polish stripper suitable for removing all water based floor finish emulsions.

Core benefits

- Quickly strips floor polish, metallised emulsions & acrylic floor finishes from vinyl & linoleum floors
- Powerful solvent based, no rinse formula
- Fast acting formulation, penetrates through multiple coats of floor polish, providing a quick and easy way to cut through and remove old and heavy hard floor polish in record time
- Excellent wetting and emulsification properties
- Versatile formulation, can be used as a spray, mop or machine stripper
- High dilutions give excellent economy in-use

How does it work?

Floor stripping is the process of completely removing old wax, soil and debris from floor surfaces.

The synergistic blend of cleaners and solvents in BioHygiene Floor Polish Stripper get to work immediately. The incredibly powerful formula visibly dissolves old coats and heavy build-ups of all floor polishes, wax, metallised, cross polymer, acrylic and clear finishes.

You will quickly observe a colour change in the Floor Stripper solution from clear to cream as the polish is broken up, lifted from the surface and effectively and permanently emulsified into the cleaning solution.

FLOOR POLISH STRIPPER

Directions for use

Test on a small non-critical area before applying. Do not use on unsealed wood, lino, or painted surfaces. Dilute 1:5 with cold water or use up to 1:3 on floors with heavy polish build up. Spread solution evenly over the floor with a suitable applicator. Leave for 5 minutes, break up softened polish by agitation, leave for 5 minutes - Do not allow to dry out. Remove slurry with applicator or wet pick up machine. Damp mop and leave floor to dry. For spray stripping dilute 1:20 and scrub with stripping grade pad. Dilute 1:10 in machine scrubbers. Protect the prepared floor with BioHygiene High Gloss Floor Polish.

Product specification

Contains: Alkaline cleaning agents and solvent

Pack Size

5 L
